RADIOLOGY & ULTRASOUND REPORT — 20-WEEK FETAL ANATOMY SURVEY

Patient Name:	Jane Doe	DOB:	05/12/1992
Exam Date:	09/28/2026	MRN:	#987-654-321
Accession Number:	RAD-99842-US	Exam Type:	US OB COMPLETE (ANATOMY SCAN)
Gestational Age:	20 Weeks 1 Day	Indication:	Routine Second Trimester Fetal Structural Survey

1. FETAL BIOMETRY & GROWTH ASSESSMENT

MEASUREMENT	VALUE (MM)	EQUIVALENT AGE	PERCENTILE
Biparietal Diameter (BPD)	47.2 mm	20 Weeks 2 Days	52nd Percentile
Head Circumference (HC)	176.4 mm	20 Weeks 1 Day	48th Percentile
Abdominal Circumference (AC)	151.0 mm	20 Weeks 0 Days	45th Percentile
Femur Length (FL)	32.8 mm	20 Weeks 2 Days	55th Percentile
Estimated Fetal Weight (EFW)	345 grams (12 oz)	20 Weeks 1 Day	50th Percentile

2. PLACENTA, AMNIOTIC FLUID & ANATOMY EVALUATION

- **Placenta Location:** Anterior, high-lying. Clear of internal cervical os (> 3.5 cm distance). No placenta previa.
- **Amniotic Fluid Index (AFI):** 14.2 cm (Normal range: 8.0 - 24.0 cm). Normal fluid volume.
- **Umbilical Cord:** 3-vessel cord identified (2 arteries, 1 vein). Normal abdominal insertion.
- **Cervical Length:** 38 mm (Transabdominal / Transvaginal closed). Normal.
- **Anatomy Survey:** Brain/ventricles, spine, 4-chamber cardiac view, stomach, kidneys, bladder, and 4 extremities visualized and anatomically normal.

IMPRESSION

1. Single live intrauterine fetus at 20 Weeks 1 Day with normal fetal biometry and growth (50th percentile).
2. Complete anatomical survey within normal limits; no structural anomalies identified.
3. Anterior high-lying placenta without previa. Normal amniotic fluid index.
